First eye-ball & eat meeting took place Feb 11. About 20 members
& XYLs showed up. The room was a bit cool but everyone had
a good time.

Directors meeting. March 9, 7 PM at Wes Murphy's.

Laws of design engineering:

1. The primary function of the design engineer is to make things difficult for the fabricator and impossible for the service man.
2. The componet which is most likely to fail must be placed in the least accessible location.
3. Circuits must contain one part that is obsolete, two parts which are not available, and three parts which are still under development.

Laws of repair:

1. If you can get to the part, no tool exists to remove it.
2. If you get the part out there are no replacements.
3. If the part is available, the original still works.

(Paraphrased from "The Canadian Amateur")
